WandaPay App Description

By Remy Muhire

1. **About WandaPay**

    WandaPay is a web and mobile based application that will serve as a payment system. WandaPay is set to revolutionize how money transfer is done through efficiency, cost effective and time saving.

    WandaPay will be connected to bank accounts through credit and debit cards whereby it will ease the money transfers from different banks. WandaPay will also simplify payments on all available e-payment platforms including customer to business and vice versa and public related services where applicable. Simply WandaPay will be a wallet where people can transfer money and purchase good.

2. **Rationale**

We strongly believe WandaPay is the ultimate tool when it comes to strategic money transfer (small and large scale). WandaPay will be built to efficiently and strategically evolve with the ever growing dynamics that could be applied in the business of money transfer and payment systems which will obviously lead to the long awaited cashless economy in Rwanda and Africa at large. To achieve a cashless ecosystem which obviously implies a wide range of systems integration and an acute managerial framework, WandaPay needs to be built with a detailed attention and a state of the art technology that will cater for all the requirements of every single aspect of the system.

3. **How it Works**

    a. Add your credit card or debit card to your WandaPay account. Login with your email and password and start transfer money or pay goods online
    b. Having Merchant account for receiving payment.
    c. Third Party Integration for external application (Developer API's)
    d. Being able to top up or withdraw money from a WandaPay account to your bank account.

4. Electronic or mobile Wallet description

WandaPay wallet will be a layer in between the user and the bank.
